QUESTIONS	ANSWERS
What is your usual IDE?	Pycharm
What are the advantages of this IDE over the others?	- Powerful Code Editor - Advanced Debugging - Smart Code Refactoring - Rich Ecosystem of plugins - Focused on Python
Which of the items resulted in the most computational time for you? Add time in seconds.	The transformation process was quite delayed due to the identification of the countries according to the cities, since for this we made use of nominatim, with this we were able to obtain the required information but it took time since a request is made, therefore the response time is extended, even more with the amount of records that come in. Time: 7200s
If you have any public portfolio (e.g., IA, computer visión, data processing...), Please share the link with us.	Private projects only
